200 -	£99

Description

The elegant and **contemporary Canterbury** chair is fast becoming a leading alternative when one is demanding a quality **wire-framed** chair. If high levels of comfort with incredible stackability are a seemingly unattainable goal – look no further. The **skid-base CSP** comes with tough polypropylene seat and back. The back contours both horizontally and vertically, allowing all kinds of **postures** to be accommodated, including those of **musicians, diners, worshippers, pupils** and more. It comes in several different shell colours. The frame is **chrome plated** for excellent scratch resistance.

The wipe-clean nature of this chair makes it popular in areas that include food and drink. Wood and padded versions are available. Wooden or polypropylene arms are available, and do not compromise **stackability**. Customers can choose from 2 different linking devices and can specify 1 of 2 book holders, if required. 2 types of floor glide are available for floor protection.

This contemporary **stacking** chair comes with a 5 year **guarantee, stacks 32 - 45 high** on half a square metre (on the optional **dolley**) and represents one of the highest **quality** items we sell. It is available for trial as a sample. Lead-time is typically 6 weeks from the date of your order.
