Description

This stylish polypropylene chair is designed for many contemporary environments and public buildings, such as cafes, halls, schools, colleges, churches and more. The steel frame is chrome plated for excellent scratch resistance and is a very stiff, strong design. The convenient handhold makes stacking this lightweight chair very straight forward. The superb contours mean comfort is achieved without padding making this a truly wipe-clean product. The polypropylene shell is moulded from a similar material as used in sailing dinghies and allows a shell that holds the brightness of colour, is stiff enough to be durable, yet flexible enough to be comfortable. The chair can be stacked 12 high, as it is cleverly compact. Versions with seat and back pad are available for increased comfort, including the option of a vinyl finish to retain the totally wipe-clean nature of the chair. Overall a strong chair, with a low price that belies its high level of comfort. It comes in several different shell colours, including white, blue, black and red. With so many plastic chairs available on the market, it has never been so important to make sure you are buying one with fool-proof stacking, that offers proper comfort. Samples are available for trial. Lead time is 5 weeks from the date of order. Please note the minimum online order quantity for this product is 10. For smaller quantities please call the office to discuss delivery costs.
