

Product ref: FTC1

Flip-Top Nesting Cafe Table

From: £145

Quantity	Price
-	£0

Description

A modernised flip-top table that can be adapted to any setting. With an array of top and base colour combinations to select from the table is equally at home in a traditional listed building as it is a newly built cafe. The flip-top mechanism allows for the tables to be nested together for efficient storage when not required, lending the table perfectly to versatile settings and flexible cafe areas. The 25mm thick MFC tops are available in a range of wood effect and other finishes. Please contact the office to request sample pieces. To ease assembly they are also fitted with embedded metal nuts, meaning that no drilling or pilot-holing is required. The table base requires simple assembly with hand tools only. As well as top finishes there is also a choice of four powder coated finishes for the base allowing it to be customised to best suit the interior.
