- Writing tablet available (please enquire)

This chair represents one of our very best lightweight stacking chairs. It combines comfort with stackability, durability, value and style. The dished seat and back make it a hit with various shapes and sizes of user. Frame finishes include black or chrome. The chrome plated frame has always been most popular however, providing excellent scratch resistance. Fabric colours available are almost limitless, and include tweeds, man-made fabrics and even vinyl. Options include black or chrome frame, clip-on link, stacking chrome arms or PU arms. We can even quote for book storage with our bespoke slip-over book pocket. The C2A chair is a variation on the globally popular C2B, benefitting from low weight and high comfort levels. With a fully upholstered back rest the chair can look superb in various different environments. The low weight of 5.6kg makes this chair popular for those for whom weight sits high in their priorities. Few chairs offer such a combination of value, quality, comfort and versatility. The new [OTD storage trolley](#) will safely transport and stow up to 30 chairs on less than 1 square metre. Our [universal chair removal trolley](#) will quickly help move a stack of up to 10 chairs for fast, efficient stowage. The trolley can then be slipped easily into a cupboard. This tried and tested design will stack 10 high. Lead-time is normally 6-7 weeks from the date of your order. There is a 5 year guarantee period for this chair. Please note that when ordering the armchair version that links are not available and should not be selected.
