50 -	£545.00

Description

These beautifully crafted stacking benches are sometimes the only excellent option available when replacing pews with something stackable and aesthetically sensitive. They can be lifted by two adults and stacked 4 high. Finished in solid beech, with the option of staining or solid oak, they are made to a very high standard and shaped to provide high levels of comfort. In beech the frames offer the strength and durability one would expect, but without the excessive weight one might expect. Options include padded seat, padded back, book storage, communion cup fitment, PVC feet, 4 lengths various frame and fabric colours and 1 or 2 arms. Stacking buffers protect the seat when stacking. This product has been the answer for those who are protecting the look and feel of a traditional building, but are keen to introduce flexible seating with added comfort. They can be successfully installed as, for example, the main weekly worship seating, with stacking chairs making up the remaining numbers required for other occasions. A sample is available on request. Modifications can be quoted for, such as different foam, to tailor the product. These British-made stacking benches may be the answer for you if you are seeking to find a compromise between stacking seating and bench capacity/aesthetics. Our 6 year guarantee applies. Lead-time is typically 6 weeks from the date of the order. This is the 1.0m version
