Description

This contemporary design poly shell task chair is moulded from high impact polypropylene, with a five star black nylon base or optional aluminium base with either swivel castors or glides. With the same shell as our **ELOT6** chair, this member of the family is ideal for use at a computer desk and allowing for continuity of style throughout individual rooms and entire buildings, particularly in schools. The gas lift allows for a 10cm change in seat height, between 420-520mm. The overall height of the chair is 780-880mm.

10 year guarantee for structural defects.
