100 - 199	£72.95
200 - 399	£71.95
400 -	£69.95

Description

The SB4M high stacking polypropylene chair provides exceptional value and durability. A chrome frame as standard provides excellent resilience, particularly during stacking. Available in a choice of colours, the chair adapts to most settings. The polypropylene seat and back provide an easily wiped clean finish. The linking glides come as standard, to provide floor protection as well as an easy method of linking without an upgrade cost. Each component of the chair can be separated and is fully recyclable, boosting the green credentials of the chair. The Chrome 3 coating is also a more environmentally friendly chroming technique. The chair stacks up to 10 high on the floor, and a stack moved with our universal chair trolley. The chair is stored even more efficiently on the purpose made dolly. This allows the chair to stack to 32 high, at a total height of 1800mm, and requires only 0.7 square metres. [Contact the office for a free, no obligation chair trial](#). The chair is a strong and practical multi-purpose high density stacking chair rated for extremely high loads. It is tested to EN 16139:2013 (Level 2).
