

Product ref: GOPUSD

Gopak UltraLight Staging Deck

From: £147

Quantity	Price
-	£0

Description

Click [here](#) to see a demonstrative video of how ultralight staging is assembled.

Ultralight staging couldn't be easier. A lightweight staging platform is positioned onto an expanding aluminium frame in seconds, and is light enough that it is safe to use by one person under Health & Safety guidelines. Despite its lightness, the Gopak frame is extremely strong, able to hold up to 1000kg/sq m (assuming even distribution). It is incredibly easy to store, often a problem for staging, with the frame collapsing to less than 2% of its size when fully open. The standard finish is an Anthracite corded carpet. We can also quote for black vinyl and heavy duty vinyl.

Select the size of deck you'd like to order from the menu on the right. The available sizes are as follows:

- 2m x 1m
- 2m x 0.52m
- 1m x 1m
- 1m x 0.52m
- 0.52m x 0.52m
- 1m x 1m Triangle
