

Product ref: GOPUSD

Gopak UltraLight Staging Deck

From: £113.4

Quantity	Price
-	£0

Description

Click [here](#) to see a demonstrative video of how ultralight staging is assembled.

Ultralight staging couldn't be easier. A lightweight staging platform is positioned onto an expanding aluminium frame in seconds, and is light enough that it is safe to use by one person under Health & Safety guidelines. Despite its lightness, the Gopak frame is extremely strong, able to hold up to 1000kg/sq m (assuming even distribution). It is incredibly easy to store, often a problem for staging, with the frame collapsing to less than 2% of its size when fully open.

Select the size of deck you'd like to order from the menu on the right. The available sizes are as follows:

- 2m x 1m
- 2m x 0.52m
- 1m x 1m
- 1m x 0.52m
- 0.52m x 0.52m
- 1m x 1m Triangle
