200 -	£140

### Description

The elegant and **contemporary Intro stacking chair** is fast becoming a leading alternative when one is demanding an affordable, quality **wire-framed** chair.

Designed as an entry-level version of our popular Canterbury chair (**CSP**).

If high levels of comfort with incredible stackability are a seemingly unattainable goal – look no further. The **skid-base PLWC** comes with tough plastic seat and back. The back contours both horizontally and vertically, allowing all kinds of **postures** to be accommodated, including those of **musicians, diners, worshippers, pupils** and more. It comes in several different shell colours. The solid steel frame is **chrome plated** for excellent scratch resistance.

The wipe-clean nature of this chair makes it popular in areas that include food and drink. An unpadded version is also available (**LWC**). Customers can choose from 2 different linking devices and can specify 1 of 2 book holders, if required. Floor glides are available for floor protection. The convenient handhold in the back makes manoeuvring the chair even easier.

This contemporary **stacking** chair comes with a 5 year **guarantee**, **stacks 25 high** on half a square metre (on the optional **dolley**) and represents one of the highest **quality** items we sell. It is available for trial as a sample. Lead-time is typically 6 weeks from the date of your order.
