Description

The Capsule soft seating combines style and comfort with acoustic enhancement, providing privacy in open plan areas such as reception spaces, foyers and offices. The acoustic properties of the Capsule cocoon also enhances the acoustics of these areas where there can often be a lot of reverb from hard floors and glass walls. The lounge and bench versions provide a more casual style, perfect for informal settings or for where the cocoon would dominate the space. This warm modern style is available in multiple sizes for each type. The design of the seating also lends itself perfectly to a two-tone fabric specification, with further choices of leg and frame finishes.
