200 - 399	£43.45
400 -	£39.8

Description

NB: Chair in photo features chrome frame option (£2.75/chair upgrade). The original EU made high-quality stacking chair (est. 2002). It has passed multiple destruction tests and proved itself over many years of tough use. Notable projects include Durham Cathedral, St Luke's Gas Street, Oundle School and Bridge Community Church in Leeds (1,200 installed). Don't settle for a copy when the original chair has such a good track record. This chair ticks so many boxes for people. The SB2M chair combines comfort with stackability, value, style, and an incredibly light weight of 5.6kg. It will stack 10 high, although we can provide you with a dolly designed and made just for this chair, allowing you to stack 25 high. It can be lifted by many with one finger and is available in several fabric types including wipe-clean faux leather. Floor glides come as standard to protect your floor and the front stacking nature of the frame means they are difficult to stack wrongly. These features all combine to make it one of our best multi-use space chairs. Options include two links, a book pocket and arms. We can even quote for hassock mounting. The chair is tested in Europe to very high standards. If you are looking for a contemporary chair which is both light on weight and on the pocket look no further. Few chairs offer such a combination of value, quality, low weight, comfort and versatility. Our universal chair removal trolley will quickly help move a stack of up to 10 chairs. Alpha's unique dolly will take 25 chairs on approximately 1/2 a square metre and the empty dollies will then stack with each other. A full dolly will still go under a standard doorway. Lead time is 5 weeks from the date of your order. 5 year guarantee.
